aQrate

At last, something that benefits all departments!

Protect your sensitive data. Organise your entire document output. Reduce your printing costs. Increase efficiency in all areas!

Many company departments have their work cut out for them when it comes to print jobs and individual processing. We have developed aQrate to satisfy all departments. Use aQrate software with any operating system to intelligently manage print jobs, simply organise document output, record and thereby reduce printing costs and effectively protect sensitive data. aQrate increases efficiency in all departments, making it a win-win solution for everyone. But don't just take our word for it.

Björn J. →
Head of IT

"We wanted a piece of software to simplify the process of setting up and managing the range of print and multifunctional systems in our company. And preferably from a provider familiar with trends like mobile printing and BYOD. So we decided to get in touch with the innovative team at TA Triumph-Adler. They provided us with detailed advice and demonstrated how we could best use and customise aQrate at our company.

For example, the driver installation now also runs automatically for new systems in the network. And the intuitive web interface means that we can easily set up the individual systems and user interfaces in such a way that the employees using the systems get the hang of things in no time. As a result, the volume of support requests has significantly decreased. Now we have more time to concentrate on real problems, and it's all thanks to aQrate!

Popular technology such as mobile printing and BYOD (Bring Your Own Device), for example, are already important components of aQrate.

Martina K. →
Assistant

"Since our company introduced aQrate, I no longer have to deal with operating the individual printing and multifunctional systems. Everything is managed via one single piece of software, which has been adapted to my individual requirements and tasks. It doesn't matter if I'm working on a PC, tablet or smartphone, as it's so easy to operate the system. I can only see the functions that I need for my tasks. This way, I can fully concentrate on my work, because I know absolutely nothing about technology. It's perfect!"

aQrate

Sebastian S. →
Managing director
of a medium-sized company

"We've had problems in the past with trying to visualise the costs of our printing and multifunctional systems. Thanks to aQrate, we now have a tool that helps us attribute costs individually and also allows us to manage costs, meaning we can clearly assign them to the relevant jobs, down to the very last cent. What's more, we can also optimally exploit the different systems in our company, by adapting print jobs, for example. At the same time, aQrate has also increased the security of our documents and, as a result, efficiency within the company, as jobs and ideas can no longer end up in the wrong hands. As the responsible manager, I am completely satisfied with aQrate. It's a valuable asset to our entire company! Oh and one last thing. Our environmental manager is really impressed, as we now have even more opportunities to protect the planet! It doesn't get any better than that!"

These are just a selection of statements that show how valuable aQrate can be for every company. Our specialists will be happy to provide you with further details and comprehensive advice. We look forward to speaking with you!

Here are some more reasons why aQrate can greatly benefit your company:

Advantages for users:

* User interfaces adapted to individual requirements
* One button operation for the most important functions
* Simple scanning processes thanks to custom scan processes
* Print jobs can be retrieved from every system
* High level of document security thanks to user login with a pin, code card or user name and password
* Manage and print using a PC, tablet, smartphone or the printing device itself
* Multiple languages are supported

Advantages for controllers:

* Simple and clear analysis options
* Costs can be clearly allocated
* Better use of resources
* Increased cost transparency and management (quotas or credit)

Advantages for IT security managers:

* Data encryption from the client to the output
* Sending of personalised e-mails
* Secure system login
* Print outs no longer end up in the wrong hands

Advantages for the administrator:

* Consultation and mutual integration by aQrate experts
* Simple administration
* User-friendly web interface
* Simple integration using an LDAP browser
* Integration across all operating systems
* Automatic installation of printer drivers
* Fewer support requests, as the MFP control panel has been simplified
* Options for virtualisation and high availability
* Fax server support (via e-mail)
* Creation of individual scan workflows

Each to his own.
The control panel is structured in a manner that is easy to understand and it can be individually configured for each user.

System requirements:

Server hardware: min 1 CPU (2 GHz), 4 GB RAM
Windows Server 2003/2008/2008R2/2012/2012R2
32-bit and 64-bit OS

User operating system: Windows/Linux/MAC OS/SAP and other
ERP systems with LPR support
